

## **Job Description for Carpenter**

Carpenters work under the supervision of foremen and typically will perform the duties listed below. As each of our projects are unique and require a varying amount of carpentry work, there will be times where the carpenter will be asked to perform other duties such as site excavation and backfill, installation of process equipment and piping, and cleanup. These conditions will be dictated by the job and the work available at the time.

### **Carpenter General Duties**

- Construction of concrete formwork
- Placement of reinforcing steel
- Placing and finishing concrete
- Stripping of concrete formwork
- Installing wooden structural elements such as temporary handrail, access platforms and ladders and various items of bracing or shoring
- Installing wood, FRP, metal, and plastic Architectural elements
- Installing millwork, casework, and other finish items
- Assisting with drywall, insulation, and caulking installation
- Assisting with demolition and removal of structural and mechanical items
- Assisting with unloading and storing of materials
